✉ 15 Algonquin Drive, Queensbury, NY, 12804, USA

EXPERIENCE

Paid Undergraduate Researcher

Clarkson University

📅 September 2017 – September 2019

- Worked with Dr. Banavar on detecting stress in user voice using voice home assistants (May 2018 - September 2019)
 - Using AWS Lambda, C++, Python, and Matlab
 - Take in voice as input, run it through an Algorithm, and give a result all through smart home and IOT devices
- Worked with Dr. Banavar on making an EEG control scheme for robots. (January - May 2018)
 - Using Python, after receiving data from an EEG headset on brainwave activity, translate changes in activity to a control scheme for turtle bots.
- Worked with Dr. Tamon on visualizing Quantum Walks. (September 2017 - January 2018)

Clarkson Open Source Institute

Clarkson University

📅 August 2017 – Present 📍 Potsdam, NY

- Gave several in Lightning Talks (5 minute CS presentations)
- Made a webserver for personal website (www.fortrash.com)
- Worked on robotic systems involving Turtle bots
- Imaged and maintained lab machines
- Taught Workshops on Fortran 77, Fortran 18, and Esolangs
- Held the position of meeting minutes
- Current Lab Director

Tech Associate

Staples

📅 July 2016 – August 2017 📍 Queensbury, NY

- Performed evaluation and intake write ups on incoming PCs
- Fixed broken PCs
- Sold new PCs, routers, printers, and other consumer tech.

EDUCATION

Bachelor of Science, Computer Science

Clarkson University

📅 August 2017 - May 2021

PROJECTS

C-String data structure for Fortran 77

- Developed a C-string like data structure for the Fortran 77 language using a subroutine and designing input and output for a character array.

Personal Website

- Used the Nginx tool to create a personal website to host information about me, it can be found at www.fortrash.com.

A Rustacean's Text Editor

- Used the Rust programming language to write a terminal based text editor with macros and text highlighting as well as version control and virtual desktops.

SKILLS

- Programming languages:
 - C++, Python, Rust, Haskell, Fortran 77, Fortran 18, Java, Matlab, Javascript, HTML and CSS, C, Flex and Bison, VHDL, Nim, LaTeX
- Tools:
 - Photoshop, Excel, PowerPoint, Word, Visual Studios, PuTTY, Unreal Engine 4, Amazon Lumber Yard, AWS, Alexa Skills, Google Actions, VIM, SSH, nginx
- Hardware:
 - Raspberry Pi, Arduino Uno/Due/Mega, ESP8266, Built and repaired computers
- Foreign Languages:
 - French

ALPHA PHI OMEGA

- Held the e-board positions of President, Webmaster and Historian
- Hosted and participated in several community service events

CLARKSON UNIVERSITY TEA CLUB

- Founder and President of Clarkson University Tea Club since 2018
